Education & Certifications

Cyber Academy of Excellence - 2026 | GPA: 93.67

Cyber Security

Richmond County Technical Career Magnet School - 2028

CompTIA Security+ 701 Certification

Cisco Networking Academy Python Essentials 1 Certificate

Volunteer Work & Extracurricular

Be Pro Be Proud | Mentor

Guided youth through simulated trade jobs and troubleshoot Malfunctioning Simulators (Physical and Software), and greeted and assisted school board faculty and staff

AFA CyberPatriot | Participant

Secured Windows and Linux systems in CyberPatriot by identifying and fixing vulnerabilities under time constraints, and built and troubleshoot networks via Cisco Packet Tracer

Freelance Technology Repair | Self Employed

Diagnosed and resolved hardware, software, and network issues performed virus and malware removal to restore system integrity, and recovered lost data from damaged or corrupted devices.

Cyber Security Pathway | Cyber Academy of Excellence August 2024-May 2026

- Completed coursework in hardware technology covering computer components, workstation setup, diagnostics, and repair tools
- Applied troubleshooting theory to identify power, compatibility, and hardware failures
- Practiced file management, backups, and system recovery procedures
- Learned IT helpdesk concepts, including customer service, asset management, and support workflows
- Studied networking fundamentals, including the OSI model, routing, switching, wireless concepts, and network security basics
- Applied cybersecurity principles, including CIA Triad protections for data at rest, in motion, and in use
- Hardened Windows systems by identifying vulnerabilities and implementing defensive configurations
- Built and troubleshoot simulated networks using Packet Tracer through Cisco Networking Academy coursework
- Strengthened troubleshooting, communication, and real-world technical problem-solving skills
- Investigated compromised or malfunctioning systems and restored functionality through structured troubleshooting
- Secured Windows and Linux systems during timed challenges

Skills

Technical Skills: PC Repair & Upgrades, Hardware Diagnostics, Windows Installation & Recovery, Malware Removal, Data Preservation, Linux CLI, Active Directory,

Soft Skills: Customer Service, Communication, Time Management, Teamwork, Decision Making

Projects

Classroom Network Diagnostics & PXE Deployment

Diagnosed and resolved Ethernet connectivity issues across classroom workstations, performed PXE booting to deploy operating systems via network imaging using Windows Deployment Services, and applied switch configuration, troubleshooting, and OS deployment skills; additionally, installed RAM in servers and racked systems alongside network switches to ensure proper integration and connectivity.

Active Directory Lab

Designed and implemented a Windows Server Active Directory lab environment using Oracle Virtualbox, including domain controller setup, DNS configuration and user/group management. Configured Group Policy Objects for a centralized management and simulated corporate network scenarios for hands on administration and trouble shooting practice.
