

To Whom It May Concern:

I am pleased to write this letter of recommendation for Virgil Carpenter, a former student of mine in Advanced Cybersecurity. During his time in my classroom, Virgil consistently demonstrated the academic ability, technical skills, work ethic, and professionalism that I believe will serve him well in his future endeavors.

Virgil successfully completed my Advanced Cybersecurity course with an A, demonstrating a strong understanding of complex cybersecurity concepts and the ability to apply that knowledge to practical situations. His accomplishments did not stop at the classroom. Virgil took the knowledge and skills he developed through his coursework and successfully earned the CompTIA Security+ certification on his first attempt. Passing a professional industry certification on the first attempt is a significant accomplishment and demonstrates both his technical aptitude and his dedication to his education.

In addition to his academic achievements, Virgil participated in the CyberPatriot competition for several seasons. CyberPatriot requires students to work collaboratively under challenging circumstances while identifying vulnerabilities, securing computer systems, and applying cybersecurity concepts in a competitive environment. Virgil performed very well in this setting and demonstrated the ability to contribute effectively as part of a team.

What stands out most about Virgil is the combination of his technical ability and his character as a student. He has demonstrated that he can learn challenging material, work effectively with others, meet deadlines, and apply what he has learned to real-world cybersecurity challenges. His successful completion of Advanced Cybersecurity, first-attempt Security+ certification, and multiple seasons of CyberPatriot competition provide strong evidence of his preparation for continued education and professional development in the technology and cybersecurity fields.

I am confident that Virgil will be an asset to any college program, scholarship opportunity, internship, or organization fortunate enough to have him. I recommend him without reservation and believe he has the potential to achieve great success in his future academic and professional pursuits.

Please feel free to contact me if additional information regarding Virgil's academic performance or accomplishments is needed.

Sincerely,

Matthew P Blanco
